

MAZIN ABDUL AZEEZ

AI/ML Engineer specializing in Generative AI, LLM workflows, cloud automation and AI-powered systems.

📞 +91 7994165971 & +971 558338206 | ✉️ mazinworlds@gmail.com | ✉️ 22ai-mazin4178@yit.edu.in | [🌐 LinkedIn](#) | [🐙 GitHub](#)

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.E AIML	Yenepoya Institute of Technology, VTU	7.10	2022 – 2026
Senior Secondary	State Board	77	2022

EXPERIENCE

AI & Android Development Intern Feb 2026 – May 2026
MindMatrix Bengaluru

- Built **AI-powered applications** with **Kotlin**, **Firebase** & **Gemini API**; developed AI-assisted prompt workflows and programmatic LLM integrations via REST APIs.
- Contributed to **NammaShaaleInventory**: structured asset data with **QR tracking**, Firebase RBAC and real-time dashboards using Git-based development workflows.

Cybersecurity & DevOps Intern Sept 2025 – Nov 2025
Elevate Labs Bengaluru

- Developed a **Python Linux Hardening Audit Tool** to identify security misconfigurations and hardening gaps; performed vulnerability assessments using **OpenVAS** and **Nmap**, implemented firewall hardening, and analyzed system security configurations.
- Built **CI/CD pipelines** with **GitHub Actions** & **Terraform IaC**; containerized apps via **Docker/Kubernetes** on Minikube.

PROJECTS

AI-VRIS — AI-Powered VR Interview Simulator Feb 2025 – Jan 2026
Unity XR · Django REST · Groq · Google STT · PlayAI [🐙 GitHub](#)

- Engineered **resume-aware LLM orchestration** via Unity XR and Django REST APIs for adaptive technical/behavioral interviews with low-latency session management.
- Integrated **Groq**, **Google STT** & **PlayAI** for real-time speech evaluation; built automated interview reporting and scoring pipelines.

CyberGuard — Incident Management Platform May 2026 – June 2026
Golang · Gin · PostgreSQL · REST API [🐙 GitHub](#)

- Developed an **incident management platform** for tracking, triaging, and documenting security events, featuring **role-based access control**, audit logging, investigation notes, and dashboards for monitoring incidents and response progress.

Containerized CI/CD Pipeline Sept 2024 – Oct 2024
Docker · Kubernetes · GitHub Actions · Flask [🐙 GitHub](#)

- Built an end-to-end automated pipeline with testing, DockerHub image publishing and Kubernetes rollout deployments orchestrated through GitHub Actions on Minikube.

MAX — Student Personal Assistant Nov 2024 – Dec 2024
Python · Streamlit · Gemini API · NLP [🐙 GitHub](#)

- AI-powered academic assistant with **PDF summarization**, document Q&A via **Gemini API**, STT/TTS voice interaction, and Streamlit UI with Telegram bot integration.

TECHNICAL SKILLS

Programming	Python, Go, SQL, C/C++, C#, JavaScript, Bash, Kotlin
Data & ML	Pandas, NumPy, scikit-learn, TensorFlow, PyTorch, OpenCV, NLP, Machine Learning, Generative AI
LLM & AI	Gemini API, Groq API, LLM Integration, Prompt Engineering, AI Workflows, REST APIs
Backend & APIs	Django REST Framework, Flask, Streamlit, Gin, REST APIs, PostgreSQL, SQL
Cloud & DevOps	Azure, AWS, Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, CI/CD
Security & Systems	Linux (Ubuntu/Kali), Nmap, Wireshark, OpenVAS, Firewall Configuration, System Hardening
Development Tools	Git, GitHub, DockerHub, Firebase, Postman, Unity, Android Studio, VS Code

KEY COURSES TAKEN

Artificial Intelligence · Machine Learning · Deep Learning · Natural Language Processing · Computer Vision · Generative AI · Prompt Engineering · Data Engineering & MLOps · Data Structures & Algorithms · Operating Systems · DBMS · Computer Networks · Information & Network Security · Digital Design & Computer Organization · Probability & Statistics · Discrete Mathematics · Optimization Techniques

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)** — Microsoft Jan 2026
- Oracle Cloud Infrastructure 2025 Certified DevOps Professional** — Oracle Oct 2025
- Google Cybersecurity Professional Certificate** — Google Jul 2024

ACHIEVEMENTS & ACTIVITIES

- Won **3 Linux-based CTF** competitions involving network analysis and privilege escalation; organized and hosted a student Linux CTF event. Dec 2023 – Apr 2025
- Participated in multiple **National-level hackathons** in AI, cybersecurity, automation, and cloud. Sep 2024 – Nov 2024
- Conducted a session on **Google Vertex AI** & Generative AI for juniors. Nov 2025
